Android tester guide

Thank you for testing. You will open eight pages of the site in Bangla on your Android phone and check that the Bangla text shows correctly: letters joined properly, nothing broken, cut off or overlapping. It takes about 30–40 minutes.

How to use this PDF

Open this PDF in **Google Drive** (tap ✎ or "Fill out form") or in **Adobe Acrobat Reader** (free). Tap a box to tick it; tap a line to type. When you're done, save the PDF and send it back with your screenshots.

About you and your phone

Your name	
Phone model	
Android version Settings → About phone → Android version	
Chrome version Chrome → ⋮ (top right) → Settings → About Chrome	
Date of the test	

Before you start

- ☐ The phone is in **light mode** (you'll try dark mode at the end).
- ☐ Open Chrome and go to https://jomidarpedia.vercel.app/. Use a normal tab, not an Incognito tab.
- ☐ Tap the menu ≡ at the top right of the site and choose **বাংলা**. The site remembers it on every page.
- ☐ If Chrome offers to **translate** the page, tap ✕ or "Never translate Bengali". A translated page can't be tested.
- ☐ On every page, **wait until it has fully loaded** before judging. For a second the text may appear in another font; that's normal.

What counts as a problem

Look at all the Bangla text: headings, paragraphs, buttons, badges and cards.

	Correct	Broken: report it
Joined letters	ক্ষ ন্দ্র ধ্ব	ক্‌ষ ন্‌দ্‌র ধ্‌ব
Vowel signs	কি কো কৈ	ি‌ক ক ো
Missing letters	সংরক্ষিত	সংর□□ত

Also report:

- a visible ্ sign (hasanta) between letters, or a dotted circle ◌;
- empty boxes or question marks instead of letters;
- text that is cut off, overlaps other text, or runs off the screen;
- a page you can **scroll sideways** (a table that scrolls inside its own box is fine);
- text that is hard to read: too faint, or the same colour as its background.

Latin letters are expected in some places: English names under the Bangla ones, IDs such as `JB-DHK-064`, photo credits and source titles in English. Only the Bangla text needs to look right.

Screenshots

Press **Power + Volume down** together.

Take **one screenshot per page** of a part with a lot of Bangla text, and one more of anything that looks wrong. Name them like `P2-jalsukha-android.jpg`; the names are listed with each page.

The eight pages

Tap a link to open it. Scroll **all the way to the bottom** of each page.

Extra checks

If you have time. Each one takes a minute or two.

E1 Dark mode

- [ ] Settings → Display → **Dark theme** on
- [ ] Reopen P2 (Jalsukha): all text is easy to read
- [ ] Reopen P4 (Ahsan Manzil): all text is easy to read

Result: ◯ OK ◯ Problem

E2 Sideways

- [ ] Turn on **Auto-rotate** in the quick settings, then turn the phone sideways
- [ ] Reopen P1 (Baliati): nothing is cut off or overlapping

Result: ◯ OK ◯ Problem

E3 Larger text

- [ ] Chrome → ⋮ → Settings → Accessibility → **Text scaling** to 150%
- [ ] Reopen P3 (Shilaidaha): text wraps and nothing overlaps. Set Text scaling back to 100% afterwards.

Result: ◯ OK ◯ Problem

E4 Search with Bangla digits

- [ ] Tap 🔍 at the top, type ১৮৪০ using your Bangla keyboard
- [ ] **Ruplal House** (রুপলাল হাউস) appears in the results

Result: ◯ OK ◯ Problem

Notes on the extra checks:

When you're done, send back

- [ ] this PDF, filled in and saved
- [ ] all your screenshots (at least eight)
